

20110118346

Docket No.: 86152(307161)
(PATENT)

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re Patent Application of:
Jae Kwan Hwang *et al.*

Application No.: 12/738,626

Confirmation No.: 3063

Filed: December 20, 2010

Art Unit: 1627

For: **NOVEL USE OF LIGNAN-TYPE
COMPOUNDS OR EXTRACT OF NUTMEG
OR ARII. OF NUTMEG COMPRISING THE
SAME**

Examiner: J. L. Karol

AMENDMENT IN RESPONSE TO NON-FINAL OFFICE ACTION UNDER 37 C.F.R. 1.111

MS Amendment
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir/Madam:

INTRODUCTORY COMMENTS

Applicants file this paper in response to a Non-Final Office Action dated December 24, 2012 along with a petition for a three-month extension of time and the required fee for a small-entity and an Information Disclosure Statement (IDS).

Please amend the above-identified U.S. patent application as follows:

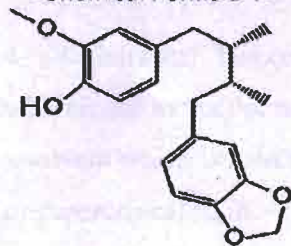

Amendments to the Claims are reflected in the listing of claims which begins on page 2 of this paper.

Remarks/Arguments begin on page 6 of this paper.

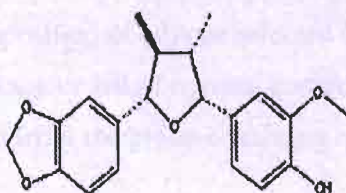

AMENDMENTS TO THE CLAIMS

1. (Withdrawn) A cosmetic composition for skin whitening comprising a lignan-type compound selected from the group consisting of the compounds represented by the following Chemical Formulas 1 to 3, or an extract of nutmeg or aril of nutmeg comprising the lignan-type compound.

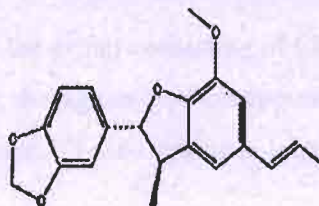

<Chemical Formula 1>

<Chemical Formula 2>

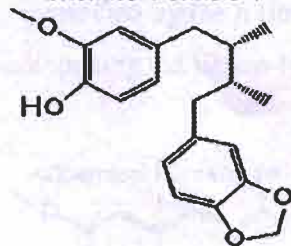

<Chemical Formula 3>

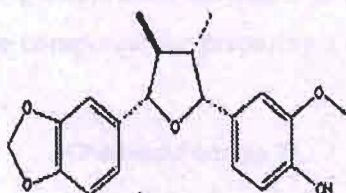

2. (Withdrawn) A food composition for skin whitening comprising a lignan-type compound selected from the group consisting of the compounds represented by the following Chemical Formulas 1 to 3, or an extract of nutmeg or aril of nutmeg comprising the lignan-type compound.

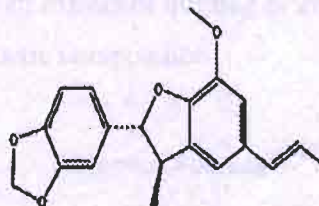

<Chemical Formula 1>

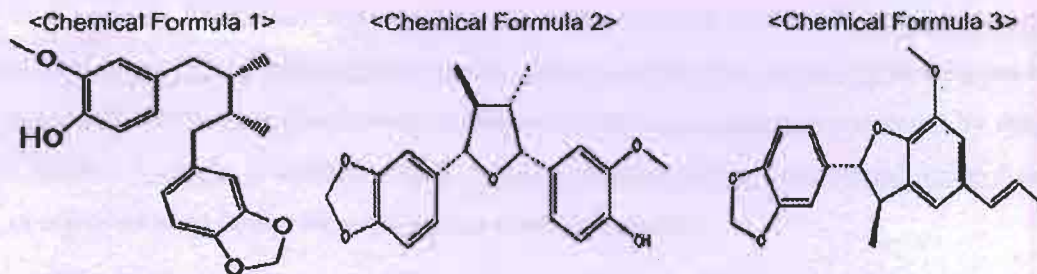

<Chemical Formula 2>

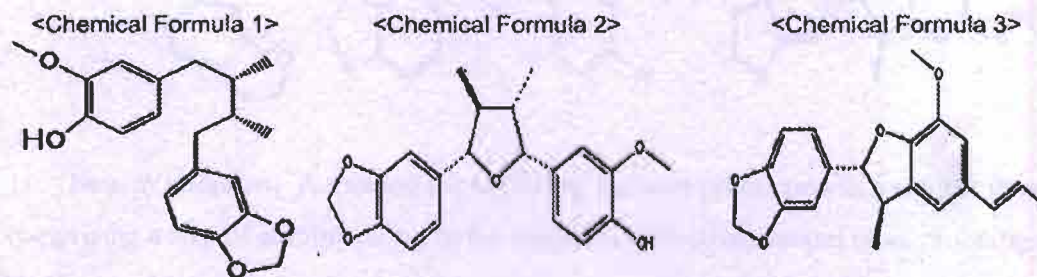

<Chemical Formula 3>

3. (Withdrawn) A pharmaceutical composition for skin whitening comprising a lignan-type compound selected from the group consisting of the compounds represented by the following Chemical Formulas 1 to 3, or an extract of nutmeg or aril of nutmeg comprising the lignan-type compound.

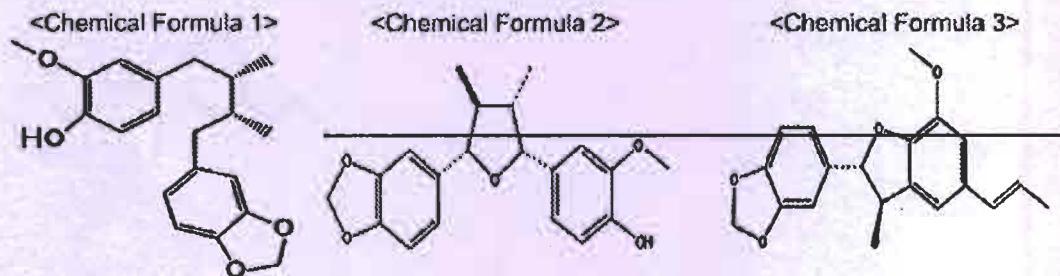

4. (Withdrawn) The composition of anyone selected from the group consisting of Claims 1 to 3, wherein the extract of nutmeg or aril of nutmeg comprising the lignan-type compound is extracted with a solvent which is selected from the group consisting of water, C1-C6 organic solvent and subcritical or supercritical fluid.
5. (Withdrawn) The composition of Claim 4, wherein the C1-C6 organic solvent is selected from the group consisting of C1-C6 alcohol, acetone, ether, benzene, chloroform, ethyl acetate, methylene chloride, hexane, cyclohexane, and petroleum ether.
6. (Withdrawn) Use of a lignan-type compound selected from the group consisting of the compounds represented by the following Chemical Formulas 1 to 3, or an extract of nutmeg or aril of nutmeg comprising the lignan-type compound for preparing a cosmetic composition.

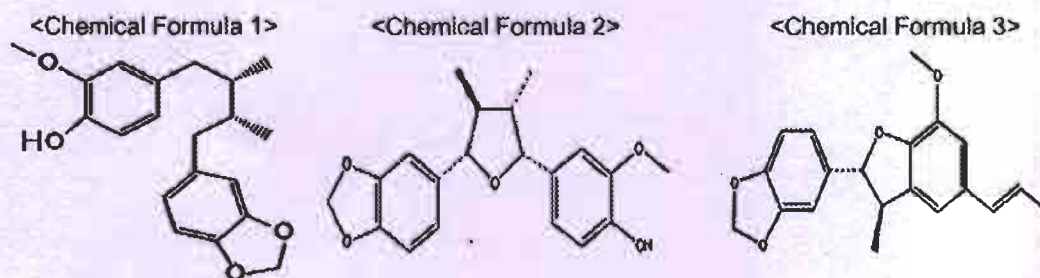

7 - 8. (Cancelled).

9. (Currently Amended) A method for inhibiting melanin production in a subject in need thereof comprising a step of administering to the subject an effective amount of ~~of a lignan-type compound~~ selected from the group consisting of the compounds macelignan represented by the following Chemical Formula 1 ~~Formulas 1 to 3, or a pharmaceutically acceptable salt thereof~~ ~~an extract of nutmeg or aril of nutmeg comprising the lignan-type compound.~~

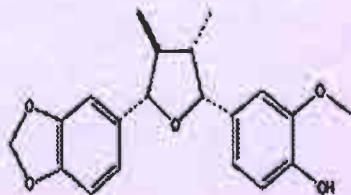

10. (Withdrawn) A method for inhibiting tyrosinase activity of a lignan-type compound selected from the group consisting of the compounds represented by the following Chemical Formulas 1 to 3, or an extract of nutmeg or aril of nutmeg comprising the lignan-type compound.

11. (New-Withdrawn) A method for inhibiting melanin production in a subject in need thereof comprising a step of administering to the subject an effective amount of austrobailignan 7 represented by Chemical Formula 2, or a pharmaceutically acceptable salt thereof

<Chemical Formula 2>

12. (New-Withdrawn) A method for inhibiting melanin production in a subject in need thereof comprising a step of administering to the subject an effective amount of licarin E represented by Chemical Formula 3, or a pharmaceutically acceptable salt thereof

<Chemical Formula 3>
