AMENDED CLAIMS

(marked-up copy)

Claim 1

A composition for facilitation of blood circulation comprising ginseng berry extract
5 as active ingredient.

Claim 2

The composition for facilitation of blood circulation according to claim 1, wherein
the ginseng berry extract is prepared by adding ethanol to dried ginseng berry, followed by
10 extraction under reflux, filtration, concentration, removal of oil-soluble constituents,
extraction by adding butanol and concentration.

Claim 3

A composition for prevention of vascular aging comprising ginseng berry extract as
15 active ingredient.

Claim 4

The composition for prevention of vascular aging according to claim 3, wherein the
ginseng berry extract is prepared by adding ethanol to dried ginseng berry, followed by
20 extraction under reflux, filtration, concentration, removal of oil-soluble constituents,
extraction by adding butanol and concentration.

Claim 5

A composition for treatment of vascular inflammation comprising ginseng berry
25 extract as active ingredient.

Claim 6

The composition for treatment of vascular inflammation according to claim 5,
wherein the ginseng berry extract is prepared by adding ethanol to dried ginseng berry,
30 followed by extraction under reflux, filtration, concentration, removal of oil-soluble

constituents, extraction by adding butanol and concentration.

Claim 7

A composition for facilitation of angiogenesis comprising ginseng berry extract as
5 active ingredient.

Claim 8

The composition for facilitation of angiogenesis according to claim 7, wherein the
ginseng berry extract is prepared by adding ethanol to dried ginseng berry, followed by
10 extraction under reflux, filtration, concentration, removal of oil-soluble constituents,
extraction by adding butanol and concentration.

Claim 9

A composition for treatment of ischemic heart disease comprising ginseng berry
15 extract as active ingredient.

Claim 10

The composition for treatment of ischemic heart disease according to claim 9,
wherein the ischemic heart disease is arteriosclerosis, angina pectoris or myocardial
20 infarction.

Claim 11

The composition for treatment of ischemic heart disease according to claim 9 or 10,
wherein the ginseng berry extract is prepared by adding ethanol to dried ginseng berry,
25 followed by extraction under reflux, filtration, concentration, removal of oil-soluble
constituents, extraction by adding butanol and concentration.

Claim 12

A composition for treatment of local blood circulation insufficiency comprising
30 ginseng berry extract as active ingredient.

Claim 13

The composition for treatment of local blood circulation insufficiency according to claim 12, wherein the ginseng berry extract is prepared by adding ethanol to dried ginseng berry, followed by extraction under reflux, filtration, concentration, removal of oil-soluble constituents, extraction by adding butanol and concentration.

Claim 14

1. Use of a ginseng berry extract A composition for improvement of skin beauty comprising ginseng berry extract as active ingredient, wherein improvement of skin beauty consists in inhibition of skin aging, improvement of skin wrinkles or skin whitening, and wherein said ginseng berry extract is prepared by addition ethanol to dry ginseng berry, followed by extraction under reflux, filtration and concentration.

Claim 15

The composition for improvement of skin beauty according to claim 14, which is for inhibition of skin aging.

Claim 16

The composition for improvement of skin beauty according to claim 14, which is for improvement of skin wrinkles.

Claim 17

The composition for improvement of skin beauty according to claim 14, which is for skin whitening.

Claim 18

The composition for improvement of skin beauty according to claim 14, which is for skin moisturization.

Claim 19

2. The use composition for improvement of skin beauty according to claim 1 any of
 claims 14 through 18, wherein the ginseng berry extract is formulated in a composition which
 comprises 0.01-100 weight% of ginseng berry extract based on the total weight of the
 5 composition.

Claim 20

A composition for improvement of male sexual function comprising ginseng berry
 extract as active ingredient.
 10

Claim 21

The composition for improvement of male sexual function according to claim 20,
 which further comprises L-arginine.

15 Claim 22

The composition for improvement of male sexual function according to claim 20,
 which comprises 0.01-100 weight% of ginseng berry extract based on the total weight of the
 composition.

20 Claim 23

The composition for improvement of male sexual function according to claim 21,
 which comprises 0.01-99.9 weight% of L-arginine based on the total weight of the
 composition.

25 Claim 24

The composition for improvement of male sexual function according to claim 20,
 which increases generation of nitric oxide (NO) in vascular endothelial cells.

Claim 25

30 The composition for improvement of male sexual function according to claim 20,

which improves penial erection.

Claim 26

The composition for improvement of male sexual function according to claim 20,
5 which is in the preparation form of tablet, pill, pellet, capsule, granule, powder, ointment,
drink or injection.
