

WO 2009/010835

PCT/IB2008/001569

We Claim:

③ [1]

1. A synergistic herbal composition ~~useful against~~ cataract comprising extract of ~~herbs selected from~~ *Foeniculam vulgare*, *Murraya koenigii* and *Triphala* optionally along with a pharmaceutically acceptable excipient.
2. A synergistic herbal composition as claimed in claim 1, wherein the composition comprises

S.No.	Herbs	%age by weight
1	<i>Foeniculam vulgare</i>	0.10 to 2.0 %
2	<i>Murraya koenigii</i> extract	0.1 to 2.0 %
3	<i>Triphala</i> extract	0.1 to 5 %

3. A synergistic herbal composition as claimed in claim 1, wherein the composition ~~preferably~~ comprises

S.No.	Herbs	%age by weight
1	<i>Foeniculam vulgare</i>	0.3 %
2	<i>Murraya koenigii</i> extract	0.3%
3	<i>Triphala</i> extract	0.5 %

4. A synergistic herbal composition as claimed in claim 1, wherein the pharmaceutically acceptable excipient is selected from the group comprising a solubility enhancing agent such as polysorbate, cyclodextrin and their derivative, ~~cremophore RH 40~~, Viscosity increasing agents such as Hydroxypropylmethylcellulose ~~and other suitable cellulose derivative~~, polyvinyl alcohol, povidone, carbopol caragenin, anti oxidants such as citric acid, EDTA and salts thereof, ~~sodium metabisulphite and other approved water soluble anti-oxidants~~, buffering agents such as citrate, borate, phosphate, citro phosphate and osmolarity adjusting agents such as sodium chloride, mannitol, glycerol, preservatives such as benzalkonium chloride, sorbic acid, methyl paraben, propyl paraben and salts thereof.

③ [in the form of eyedrop, ointment, cream or gel suitable for ophthalmic administration for delaying the progression and onset of]

③ [polyoxyl 40 hydrogenated castor oil]

~~4. The synergistic herbal composition as claimed in claim 1, wherein the composition is in the form of eye drop, ointment, cream or gel.~~

5 5. A process for preparing the synergistic herbal composition as claimed in claim 1, wherein the said process comprises the following steps;

10 (a) Coarsely grinding the individual herb ~~such as herein described~~ and extracting it with solvents having different polarity selected from the group such as water, alcohol, acetone, ethyl acetate, Petroleum ether, chloroform or their mixture in different ratio; ⁶[~~1~~

(b) Optionally concentrating the extract obtained in step (a) ^{first alternative} under vacuum and converting the same either in the form of thick paste having around 20-30 % solids or in the form of dry powder;

15 (c) Formulating pharmaceutically acceptable herbal composition by combining the extracts obtained in step (a) or step (b) in different ratios ~~such as herein described~~ to yield the synergistic herbal composition in the form of eye drop, ointment, cream or gel;

20 ⁶[~~Alternatively the extraction can also be performed using distillation method and distillate can be directly used for formulating synergistic herbal composition such as herein described.~~
