

IN THE CLAIMS

Please amend the claims as follows:

Claim 1 (Currently Amended): A method for treating a wound of a patient that is a symptom of at least one of dry gangrene, wet gangrene and diabetes, the method comprising:

administering forming a homogenized composition comprising *anethum graveolens* (dill), [[the]] a resin/gum of [[the]] a *commiphora tree* (myrrh), [[the]] and a peel of *punica granatum* (pomegranate), the composition being formed by mixing portions of dill, myrrh, and pomegranate having a same weight; and to a wound of a human suffering from at least one of diabetes, dry gangrene, and wet gangrene,

administering topically, the formed composition to the wound of the patient suffering from at least one of diabetes, dry gangrene, and wet gangrene, wherein the homogenized composition is topically being administered in an amount effective to treat the wound, wherein the homogenized composition is administered in an amount of at least 40 mg and at most 1g of the homogenized composition/cm² of the wound.

Claim 2 (Currently Amended): The method of claim 1, further comprising: wherein Different ratios of an amount of weight of the *anethum graveolens* (dill), the resin/gum of the *commiphora tree* (myrrh), and the peel of *punica granatum* (pomegranate) is 50 mg.

Claim 3 (Currently Amended): The method of Claim 1, wherein the composition is topically administered in an amount effective to enhance a wound tissue regeneration from 80 to 100%, based on the wound tissue regeneration ~~of the wound~~ immediately before the topical administering, and ~~the~~ a tissue regeneration level of the wound 2 days after the topical administering.

Claim 4 (Currently Amended): The method of Claim 1_a wherein the homogenized composition is in a gel and/or ointment based form.

Claim 5 (Currently Amended): The method of Claim 4_a wherein the composition in the ointment form may be prepared by dissolving a predetermined amount of the homogenized composition in a corresponding predetermined amount of olive oil.

Claim 6 (Currently Amended): The method of Claim 1_a wherein the composition is topically administered to the wound in powder form.

Claim 7 (Currently Amended): The method of Claim 1_a wherein the composition is topically administered to the wound in gel form.

Claim 8 (Currently Amended): The method of Claim 1_a wherein the composition is topically administered to the wound in ointment form.

Claim 9 (Currently Amended): The method of Claim 7_a wherein the composition is topically administered to the patient in the gel base form_a and wherein the composition further comprises at least one pharmaceutically acceptable excipient selected from the group consisting of an oil, a lipid, a stabilizer, an emulsifier, a pH adjusting agent, an emollient, a humectant, a preservative, a ~~stabilizer~~, an antioxidant, a chelating agent, an initiator, and a thickening agent.

Claim 10 (Currently Amended): The method of Claim 8_a wherein the composition is topically administered to the patient in the ointment base form_a and wherein the composition

further comprises at least one pharmaceutically acceptable excipient consisting of an oil, a lipid, a stabilizer, an emulsifier, a pH adjusting agent, an emollient, a humectant, a preservative, ~~a stabilizer~~, an antioxidant, a chelating agent, an initiator, and a thickening agent.

Claim 11 (Currently Amended): The method of Claim 1, wherein the composition is topically administered to the wound only if the wound has been cleaned using alcohol prior to the administering.

Claim 12 (Currently Amended): The method of Claim 11, wherein the homogenized composition is administered to the wound twice a day, and is covered with clean gauze after every administration.

Claim 13 (Currently Amended): The method of Claim 1, wherein the composition is topically administered to the wound for a minimum period of 14 consecutive days, and a maximum period of 30 consecutive days.
